Still toying with chords on my new Kala U-Bass made me write these settings of one more of my favourite hymns.

At #1 you will find a two part setting very much reflecting the soprano and bass lines as found in the Danish hymnal.

At #13 you will find a more complex setting, where the top and bottom lines are almost the same as in the above setting. The inner notes of some of the chords do not really reflect the voicings of the alto and tenor lines of the setting in the Danish hymnal, yet they strive to indicate the chord progression as detailed as possible. The string names and fret numbers are attempts of a simple tablature for the notes below the melody.

The setting at #25 is the same as the one at #13. Only that the fingering indications have been removed to allow for an individual fingering approach.

Some of the chords around and above the 12th fret are challenging. You may note that the 3rd chord in #23 is the same fretted figure as the first and last chords.

You might want having a look at the index over my free arrangements of music relevant in church, community, and school contexts. Fairly easy through more complicated: <http://launch.groups.yahoo.com/group/YorkMasterBBb/files/%20%20Index/>
